

RADITEK Synthesized Phase Lock DRO, excellent phase noise performance

RADITEK'S new DRO based, synthesizer product line can be configured as a fixed frequency phase locked DRO, which unlike conventional Phase locked DROs does not require a reference frequency that is a sub multiple of the output frequency. The output frequency can be to over 25GHz. Another option is to have some limited tunability with only a small reduction in Phase noise over a pure fixed DRO type. Reference can be 10MHz, 100MHz etc. Contact sales@raditek.com for more information.

RADITEK specializes in RF Design and Development of "High Volume / Low Cost" Microwave, Wireless and Telecom Broadband Components, Assemblies and Systems. Please see our website at www.Raditek.com or email us at Sales@Raditek.com with any questions you may have.
