

Weatherproof 2 way Splitter Combiner

RADITEK's Our new weatherproof 2 way Splitter Combiner is designed to connect directly into a mast top Antenna to allow connection of two Transceivers. These can be equally split or at a 3:1 ratio with 2.5dB insertion loss on the low loss port, optimizing the main unit while permitting a standby to monitor.

The unit can be bolted on or strapped using slots in the base. The unit is waterproof, and the housing is finished in a tough epoxy paint finish. The units can be optimized such as the one shown to 6.0-8.5GHz or narrow band 7.2-7.5GHz, operating over the full temperature range of -40 to +85°C with up to 10Watt Power handling.

RADITEK specializes in RF Design and Development of "High Volume / Low Cost" Microwave, Wireless and Telecom Broadband Components, Assemblies and Systems. Please see our website at www.Raditek.com or email us at Sales@Raditek.com with any questions you may have.
